Microsoft Dynamics Solutions

Microsoft Dynamics GP

Financial Management

Microsoft Dynamics GP Financial Management helps you track, manage, and analyze financial information and includes tools and accounting structures that you can adjust to best serve your needs. With tight integration between modules in Microsoft Dynamics GP, you can enter data one time and provide accurate, real-time information throughout your financial solution.

I-NET Dynamics is a Microsoft Gold Certified Partner, distributing Microsoft Dynamics GP since 1994.

Supply Chain Management

Microsoft Dynamics GP Supply Chain Management helps you connect customer requirements with product design, work better with business partners, and better track workflow across manufacturing, purchasing, finance, sales, and distribution. By using integrated systems that link functions across your organization, you can reduce time-to-market and improve control of your entire supply chain.

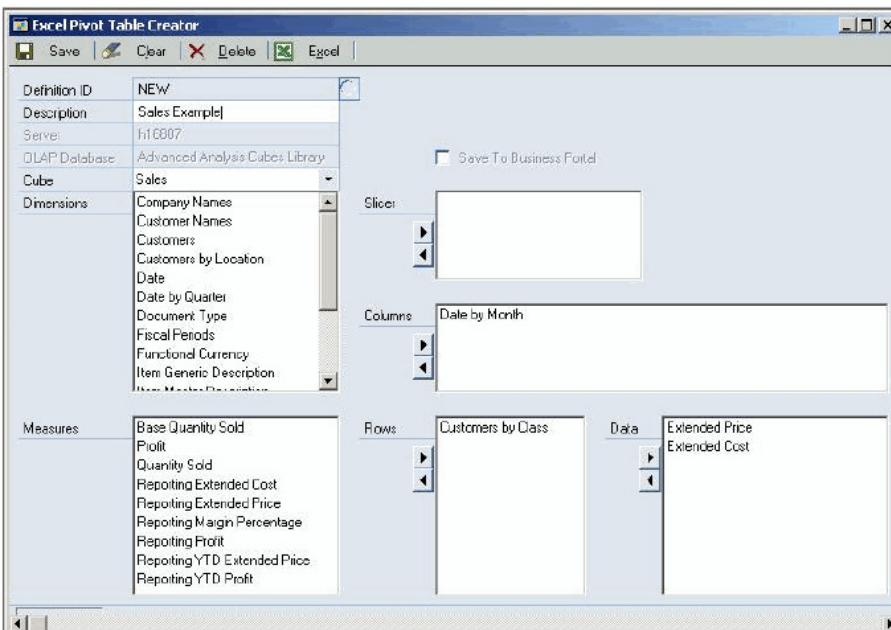

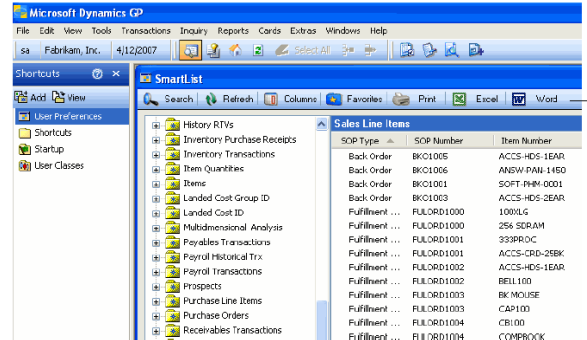

Project Management

Microsoft Dynamics GP Project Management helps managers and staff create billing structures, track expenses and reduce billing cycles. Its innovative tools can integrate with your existing business management software, accelerate project workflows through automation, so people can spend less time administering business processes.

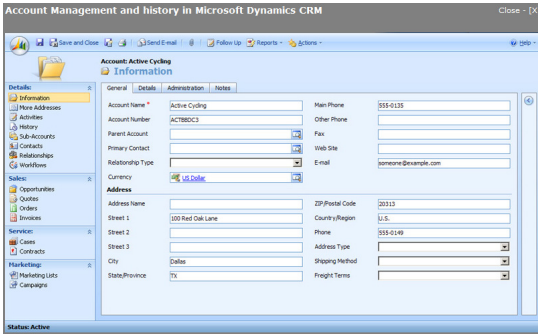

Analytical Reporting

Microsoft FRx Reporting is a comprehensive financial reporting and analysis application that provides people with the tools they need to gain insight into business performance and take quick action. Its simplified reporting with design wizards and customizable report templates that help people quickly create relevant financial reports, accurate reports generated from pulling information directly from the general ledger and a reduction in error-prone double entry.

Microsoft Dynamics GP Analysis Cubes for Excel extracts data using Data Transformation Services (DTS) packages and places it in a data warehouse. The information in the data warehouse is processed to generate the OLAP cubes. (OLAP stands for online analytical processing, which is a way to organize large business databases.) A cube is a data structure that contains OLAP data, organized in dimensions and fields. Data in the cubes can be displayed in Excel worksheets through pivot tables.

Microsoft Dynamics Solutions

Microsoft Dynamics CRM

Customer Relationship Management

Microsoft Dynamics CRM enables you to create a centralized repository of customer data that sits neatly alongside Microsoft Office and Microsoft Office Outlook. Employees could easily access to Microsoft CRM sales, marketing, and customer service modules to make sales decisions, market products, solve problems, and get strategic views of the business.

- **Sales Management**

Streamline and automate your sales processes and enable sales people to create a single view of the customer to help ensure a shorter sales cycle, higher close rates, and improved customer retention. Microsoft Dynamics CRM business software gives sales professionals fast access to useful data online or offline so they can work efficiently and spend more time selling.

- **Customer Service Management**

Deliver customer information, case management, service history, and support knowledge directly to the desktops of customer service representatives and supervisors, giving them the tools to deliver consistent, efficient service that enhances customer loyalty and profitability. Microsoft Dynamics CRM provides a comprehensive customer service solution that is familiar to users, completely customizable to your business process, and scalable to meet the growing demands of any size business.

- **Marketing Management**

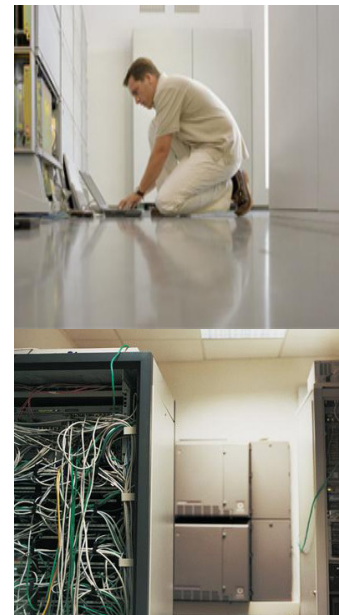

Provide marketing professionals with robust data cleansing and segmentation tools, leading campaign management features, and insightful marketing analytics to increase the effectiveness of marketing programs, improve efficiencies, and better track key metrics. Microsoft Dynamics CRM business software provides a holistic, comprehensive set of marketing capabilities so you can target your customers effectively.

IT Managed Services Solutions

We are able to maximize the return of your IT investments while you could benefit from higher quality of services and innovative infrastructure solutions. Businesses with little or no in-house IT resources find it more economical and efficient to outsource the administration of the IT infrastructure to us as our IT Managed Services caters to all your operation requirements, reduce IT head count and off-load your IT problems.

Our IT Managed Services focus on:

- **Workstation Management**
 - * *IT asset management*
 - * *PC support and management*
- **Server Management**
 - * *Deployment, Configuration, Consolidation, Backup, Recovery and Upgrading of Servers*
- **Network Management**
 - * *LAN Cabling, Fiber Optic and Wireless Installation*
 - * *VoIP Phone setup*
 - * *Switches, Routing and IP settings*
- **Security Support**
 - * *VPN, Remote access, Firewall Deployment*
 - * *Virus removal and prevention*
